

CALADRIUS HEALTHCARE

This Web-App helps frontline healthcare COVID workers by taking all the readings like O₂ levels, Blood Pressure, Pulse Rate etc via user who is there with patient just by scanning a QR code or the weblink & also brings important resources to their finger-tips via Gov Websites, verified tweets & Helpline nos. & encourages the user to donate plasma/blood also.

File Caladrius-Main has :

Index.html, HTML Folder, CSS Folder, JS Folder, Images Folder & Fonts Folder

NOTE: Site is fully functional and opens from index.html. Rest database i.e firebase is fully online so we're putting database links below for any sort of reference~

Link 1: <https://donateform-96861-default-rtdb.firebaseio.com/>

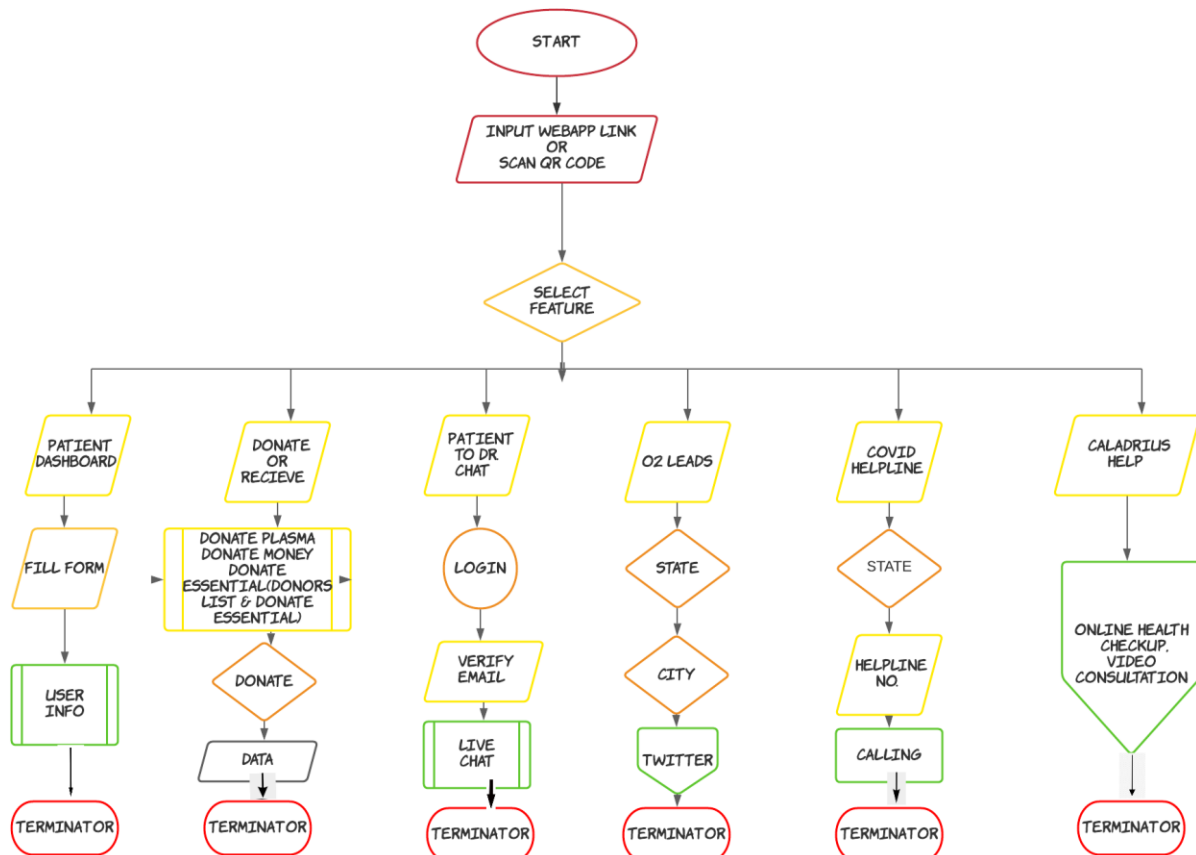

Link 2: <https://caladriuschat-default-rtdb.firebaseio.com/>

Requirements:

A Web-browser or any IDE like VScode(on live server) that supports html files & a QR Code Scanner (if possible else use link or files).
